We Are Selling Cheaper Mileage

You may get extraordinary mileage out of any one tire—but that's not the way to figure mileage.

Get the average of mileage given by a pair of tires or a set—and you will get nearer to the actual cost of mileage to be charged to the upkeep of your car.

It's just because we've taken the trouble to figure values that way, that we recommend Ames Holden "Auto-Shoes."

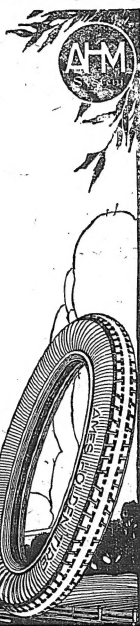

We know they are giving real mileage over the worst roads in the country and their "average" performance leaves no doubt in our minds that Ames Holden "Auto-Shoes" will give you the cheapest mileage you can buy. And they are guaranteed without time or mileage limits. Drop in and let us show you and tell you about

CHINOOK, ALTA. Phone 10

WORST FIRE IN THE HISTORY OF CHINOOK

Thursday morning witnessed one of the worst fires in the history of Chinook when the greater portion of a Main street business block containing five buildings was levelled in the space of about three hours. The buildings destroyed were Hewitt's office containing the telephone exchange, McAllister's farm implement warehouse, Charlie Ray's barber shop, Chapman's poolroom and two vacant structures adjoining Mr. Hewitt's establishment. The loss will approximate \$20,000 and is fairly covered by insurance.

The blaze broke out in the upper portion of the poolroom immediately over the barber shop and when discovered the flames were just breaking through the ceiling. It was first noticed by a woman waiting for the 1.17 train at the station. She notified Mr. Pollock, the night operator who turned in the alarm. Volunteers quickly turned out and in a few minutes several bucket lines were established from the hotel and adjoining sources of water supply.

The town's fire-fighting apparatus did not get into action early enough to be of efficient service. The volunteers in dragging it across the lot adjoining upset it and it was some time before it could be recharged.

Despite the efforts of the firemen, the blaze spread quickly from the pool hall to the adjacent buildings, but it was successfully confined to the area above-mentioned and the structures on either side were saved. As the main conflagration was dying out, fire broke out in the wall of Bert Knight's vulcanizing shop, but it was extinguished by the aid of chemicals in a few minutes and only slight damage done to the building.

The volunteers worked hard and long and to their efficient efforts must be given credit for the saving of the greater portion of the business section of the town. Hotel guests and the crew and passengers from the incoming train No. 10 also greatly helped in the fighting of the fire.

The origin of the fire has not as yet been established, but it is likely that some investigation will be made.

Thursday's Rainfall Quite Heavy Locally

Reports from surrounding points indicate that the rain of Thursday night was quite general in this district. Chinook and environs received a very bountiful downpour while at Youngstown and Cereal the rain is reported to have been even heavier. Farmers declare that the rain came at a most opportune time and that it was badly needed in most parts where the soil was becoming very dry and difficult to work. The crops are looking very promising in this district and plainly show the beneficial effects of the wetting received.

It is interesting to note that exactly one year ago Thursday a heavy rain fell in this area.

Personalities

A large crowd of Chinook residents attended the Chautauqua festival at Cereal last week and they speak in the highest terms of the fine programme presented this year. Indications point to a very successful Chautauqua in Chinook this fall.

Charlie Ray plans to establish a new pool hall in the old bank building in addition to a barber shop.

The telephone exchange has been temporarily located in Rennie's office.

The U. G. G. elevator closed from July 2-14, but should you want to take out hail insurance call and see me as I don't propose to leave town. C.W. Rideout

Robt. Smith returned Friday from his two week's holiday at the coast where he attended the convention of the Weekly Newspapers Association.

The Service Garage is selling plain casings 30 by 3 1-2 at 16.50 Non-Skids at 19.50 and Nobby Treads at 20.00. Other sizes of tires and tubes at proportionate prices.

Will Dyer, who has been acting editor of the Advance for the last two weeks, left Sunday for Calgary and other points.

Mr. and Mrs. E. C. Stata and son Alfie are visiting friends in Calgary. Alfie is undergoing hospital treatment.

Mrs. J. R. Miller's mother, Mrs. Clark, left recently on an extended visit to Vancouver.

Mrs. W. Stickney and Master Basil of Morrin who have been visiting Mr. and Mrs. Boyer returned home last week.

Mr. A. McAllister, the I. H. C. agent has established in temporary quarters in the old Fitzgerald building on Main street.

An interesting and well varied program has been prepared by the committee in charge of the Union picnic to be held under the auspices of Naco and Little Gem U. F. A., at Little Gem Schoolhouse July 13. In addition to a lengthy card of sport events a moving picture show and dance will be staged at night.

If you want to see the best scraps ever staged in these parts go to Cereal on Friday next, when some of the best fistic artists in the west will clash as the main attraction of the sports day program. A number of other fine events are also planned and Cereal is making extensive plans to put on a good show for the entertainment of visitors.

The U. F. W. A. desire to hold an organization meeting on Saturday, July 2, at 8.30 p.m. in the Chinook school. All desiring to join are invited to be present.

Constable Torpey of the Alberta Provincial Police, was in town Saturday investigating the fire of Thursday.

"The Store that Saves You Money"

There are more than 150 brands of baking powder in Canada; and the fact that there is more MAGIC BAKING POWDER used than all the other brands combined shows why Magic Baking Powder is known as Canada's best baking powder. CONTAINS NO ALUM.

Man's Greatest Asset

The universal membership enrolment campaign recently conducted by the Red Cross Society throughout Canada had for its object the arousing of the people to the vital need of greater personal interest in the matter of health. It was not a campaign to raise money, but a Dominion-wide and well-organized effort to secure an active and intelligent public interest in measures for the prevention of disease, it being realized that an ounce of prevention is worth many pounds of cure. The average man, woman and child gives little heed to their physical well-being until they are afflicted with some ailment, and then there is a hurry-up call for a doctor.

That there is need for a great awakening on the part of the public in regard to matters of personal hygiene and public health was demonstrated by the enforced medical examination of men for military services during the war years, but, startling as were the disclosures from those examinations, even more staggering are some recent figures and opinion contained in an article in The Journal of Health and Sanitation, written by Dr. J. H. Kellogg, superintendent of the famous Battle Creek Sanitarium.

Races of men have sometimes died out and utterly disappeared and Dr. Kellogg is of the opinion that this may happen to the whole human family if we continue to live under what he considers present unnatural conditions. Man, says Dr. Kellogg, is a very old-fashioned animal trying to live in a new-fangled way, in a manner that no animal ever before adventured, and so unnatural and so ill-adapted to his constitution and his requirements as to render his ultimate undoing inevitable. Man is by nature an open-air dweller. But the business and professional men, incarcerated behind the doors of their offices, with their assistants, day after their time, and, on the average, twenty years sooner than the farmer whose vacation keeps him in the open.

Present-day habits and methods of living are held accountable for the physical deterioration of the race, and for the prevalence of diseases which are carrying off people by the million. According to Dr. Kellogg, the United States loses from its population of 100,000,000 by death 1,500,000 people every year, while 3,000,000 people are sick all the time. In other words, one-fifth of the population are inefficient or lost. He estimates that an average of seven days are lost from labor by sickness every year. Tuberculosis is gaining ground, and kills one out of every ten of the population. Cancer kills one in twenty. Other maladies are rapidly gaining ground. In England and Wales the insane are increasing twice as fast as the sane, and in France ten times as fast. Coupled with these alarming symptoms, there is the serious fact that the birth rate in nearly all civilized countries is rapidly declining.

Dr. MacNeill, superintendent of the Mental Hospital at Battleford, Sask., made the statement recently in a public address at Regina that at the present rate of increase of mentally deficient people there would not be enough mentally efficient people to look after them fifty years hence.

In support of his contention that present habits and methods of living are responsible for existing conditions, Dr. Kellogg draws attention to one of the interesting lessons from the war, namely, the notable lowering of the death rate in several countries. In Denmark the death rate fell 35 per cent, due in the opinion of Dr. Hindhede, the Danish food controller, to simpler habits of living, and especially the low-protein diet and the use of cod-liver oil. In Germany, too, diabetes has practically disappeared from the same cause, and gout, formerly very common, is now unknown.

Good health is the greatest asset any person can possess. Wealth is of little value to a man if he does not possess good health so that he may enjoy it. Without health no one can get much pleasure out of life. Lack of health no person can be wholly efficient. Ill-health is waste. Yet the best medical experts agree that, by taking proper precautions there is little reason for sickness, and that many diseases which now mangle their victims by the millions could be readily stamped out.

Health studies and health conditions must be given first place and foremost attention in our public schools. People must be made to understand that soundness of body is fundamentally essential in business, art, literature, politics and religion, as well as in warfare, sports and industry. By creating an enthusiasm for health promotion and physical perfection a long step forward will be taken towards the realization of that better state for all people towards which the world is blindly groping. A popular, nationwide Crusade for Good Health is imperative. Governments can do much, for the main essential is an aroused and active interest on the part of every individual citizen. The promotion of health is the only real, lasting and basic national policy for any country.

Goose's Appetite.

How many grains of corn can a hungry goose eat in two hours? Experts guessed anywhere from 2,000 to 3,000. Then a hungry goose was produced and the grains were counted. The goose ate exactly 431 grains in two hours.

It says in your home industry, Buy Postum. It's a habit in your own house.

Innocent Tots.

Two children were standing before the Venus de Milo. "Wonder if she was married," said one. "Course not," said the other. "No one could ask for her hand, 'cos she didn't have any."—Boston Transcript.

It takes fifteen days for the average human body to recover fully from the loss of two consecutive nights sleep.

Friend or Foe?

Many people find that tea and coffee are foes to their health, but that Instant Postum is a friendly table-drink.

This pure cereal beverage is rich in aroma and flavor—fully satisfying—and contains no element of harm for nerves or digestion.

"There's a Reason for POSTUM"

Sims Spent Younger Days in Toronto

Father Was Superintendent of Toronto and Nipissing Railway. Rear-Admiral William Sowden Sims, whose pro-ally speeches in Great Britain have resulted in his recall to Washington by the secretary of the United States navy, lived in Toronto with his father and mother when he was fifteen years of age. His father, who went from Philadelphia to Port Hope about 1834 as civil engineer on the construction of the railway from that town to Lindsay, moved with his Canadian wife and two children to Toronto in 1873 and became superintendent of the old Toronto and Nipissing Railway which ran from Toronto up through Beaverton and Carnation to Cobocook where it now ends.

In an old city directory of that year the future admiral's father is listed as an official of the railway boarding at the Queen's Hotel, Front Street.

For Stiff Neck And Sore Throat

Immediate relief comes from rubbing Neroline over the chest and lower part of the neck. Rub in deeply—lots of rubbing helps. Neroline reaches the congested parts at once, relieves tightness, takes out the soreness. A bottle of Neroline in the home relieves a hundred ills, internal and external. Used for nearly half a century, as a general household remedy. Large bottles 35c at all dealers.

Canada's Huge Wheat Area

Prairie Provinces Have More Than Ninety Per Cent of the Wheat Area.

The total area sown to wheat this season in the Dominion of Canada is estimated at 18,654,000 acres, an increase of half a million acres over the 1920 area, constituting a new record for this grain. Seven hundred and nine thousand one hundred acres of this is seeded to fall wheat, leaving 17,945,000 to be sown this spring.

The prairie provinces have more than ninety per cent of the Dominion's wheat acreage, with 17,418,900 acres. This shows an increase of 577,000 acres over the previous year.

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. JALLES CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing blood and building up the system, JALLES CATARRH MEDICINE restores normal conditions and allows Nature to do its work. Give it free. F. J. Clesney & Co., Toledo, Ohio.

Big Berthas Have Been Destroyed

Last of the Seven Was Scrapped in 1919.

Replying to the inter-ally military control commission's note regarding the location of the "Big Berthas" used by the Germans during the war the German government said there were seven such long-range guns, of which four were destroyed before the armistice; the fifth was scrapped at Essen in April, 1919; the sixth was scrapped at Meppen, and the seventh at Magdeburg in November, 1919.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Mrs. W. Beesley, Millie Roche, Ont., writes "I have used Baby's Own Tablets for the past eight months and would not be without them. I used them for indigestion and teething and my baby is cutting his teeth without any trouble whatever. I can highly recommend the Tablets to other mothers." What Mrs. Beesley says thousands of other mothers say. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion and making teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

"Equinoctial" a Myth.

That the equinoctial storm is a myth is demonstrated by an accurate co-operative observer of the United States Weather Bureau, says the Scientific American. This popular belief is probably the result of teaching handed down from father to son. Old weather-savvy are very hard to eliminate.

Manitoba Free Press Crop Report.

The Manitoba Free Press crop report, published June 7th, states that crop conditions are, if anything, more favorable than at May 17th. "It would be difficult to think of a more generally satisfactory report of conditions spread over so wide a territory," says the Free Press.

Keep Minard's Liniment in the house.

W. N. U. 1737

WHEN WOMEN SUFFER

Look for weakness or ill-health. See if there is not a side ache, headache, restlessness and the "blues." The gentle assistance of Dr. Hamilton's Pills will relieve you. They clear up sick headache, remove wastes and poisons from the system. Girls and women can use Dr. Hamilton's Pills with great success. Thousands use no other medicine and rely solely upon Dr. Hamilton's Pills to regulate the system and keep it in smooth running order, 25c all dealers or The Catarthozone Co., Montreal.

"Your Teeth"

By Rea Praetor McGee, M.D., D.D.S., Editor of Oral Hygiene.

CHILDREN'S HABITS.

Copyright, 1921, by Rea Praetor McGee.

Habits formed in childhood are very difficult to break. The younger the child, the more quickly a habit is formed. Their experience having been so limited, they very quickly become accustomed to almost any new diversion that may come their way. Many little things that, at the time, seem trivial, will have a severe effect in after years.

One of the worst habits that a young child forms is that of thumb sucking. Many mothers who should have the baby quiet but dissatisfied with life in general and raising Cain. But the pacifying of the youngster by this method will cause a great deal of difficulty.

When a child sucks its thumb it pushes the roof of the mouth upward so that it makes a very high arch and as the roof of the mouth is the floor of the nose, the nasal space is reduced and the septum of the nose is pushed over either to the right or to the left—usually to the left.

The upper teeth in front, along with the bone in which they are imbedded, are pushed forward and upward, and the lower front teeth and the surrounding bone are pushed inward and downward.

Medicated dentifrices should not be used by children. What they need is just thorough scrubbing of the teeth twice each day with clean water and a mild, pleasant tooth paste or powder.

Japs Plan To Raft Timber From B. C.

Think Davis Structure Will Stand Trans-Pacific Passage

A Japanese firm proposes to make another attempt to raft timber from British Columbia to Japan. They believe that the Davis raft structure, of which the outside rows of logs are laced with cable, can be made to stand the trans-Pacific passage. The first raft will leave this coast about August. It will have a super-structure of piled logs, strongly laced. Hitherto rafted logs have not withstood long sea journeys, except one which was taken from San Francisco to China about twenty years ago. Favored by calm seas the raft was safely landed. The Chinese, however, instead of big logs, took ten years to cut up this boom, using long, hand rip saws to make the boards.

Phosphorus Discovered As Long Ago as 1670

Chemist Prepared It In Small Quantities From Bones

What we now call phosphorus was discovered by a chemist called Brand in 1670, who prepared it in small quantities from bones. In those days of mysticism a substance that burned and emitted light without being ignited was hailed as a discovery of the principle of life. The sensation was just like what was made 250 years later by the discovery of radium.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very considerable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Crossing Stock With An Automobile.

If a motorist guns down a pig it is sure to be a blooded Berkshire, remarks the Boston correspondent. Every chicken slaughtered is a pedigree bird worth \$40 to \$50. A yellow barnyard cur is a wire-haired fox terrier. A calf always of Alderney or Guernsey blood—in fact, nothing seems to improve stock like crossing it with an automobile.

New Camera's Great Range

Can Photograph From Height Where Airplane Is Invisible.

Scientists of the United States Bureau of Standards revealed the details of a new photographic process but recently perfected. The discovery is expected to be of tremendous military value to the air service, as well as to have incalculable scientific and commercial application. It will give to the eye of the camera power which nature has never endowed to the human eye, for it will be possible for airplanes to make photographs from heights so great that the planes themselves will be invisible from the earth, and to penetrate haze that the human eye cannot pierce.

Not a Match, Either.

A pouponnet manufacturer of machinery was showing a stranger over his factory.

"Fine piece of work, isn't it?" he said, indicating one machine.

"Yes," said the visitor, "but you cannot hold a candle to the goods we are turning out."

"Indeed! And what is your line?" "Gunpowder."

Fiction is less strange than the truth because we miss it often.

Drink Coca-Cola. DELICIOUS AND REFRESHING. EVERY little movement means more thirst. THE COCA-COLA COMPANY. Toronto and Winnipeg.

Chinese District Overcrowded.

The Chinese population of London is increasing rapidly and the district which has been appropriated by the celestials is becoming overcrowded so that they are encroaching on the neighboring districts.

A century ago 300 species of orchids were known, and those very imperfectly. Now the latest authority gives the number of known species as 10,000.

OPPORTUNITIES IN THE VETERINARY PROFESSION

If you desire to enter a profession you should consider what the new field of Veterinary Science has to offer. Graduates have splendid opportunities for a successful career. You should inquire.

CANADIAN NATIONAL RAILWAYS

British Stock Raisers Should Not Fear Canadian Competition

London.—A Scotch witness before the cattle commission said that the Glasgow corporation had consistently for 20 years advocated the admission of Canadian stock, which, he said, were more free from disease than the home supply. In his opinion all the evidence pointed to the fact that Canadian cattle imports would lower the price of meat. One witness reminded the commission that the minister of agriculture lost his election at Dudley on the embargo question.

The president of the London Retail Meat Traders urged the necessity of providing the country with a more abundant supply of home-killed meats such as would come from Canada. The Glasgow Herald, commenting on the evidence of Hon. Duncan Marshall, minister of agriculture for Alberta, says it was notable on account of the minister's frank presentation of the Canadian case.

"A year ago," says the Herald, "when he attended the Highland Show, Mr. Marshall impressed the agriculturists of Scotland as an administrator whose grip on agricultural affairs was as refreshing as his breezy oratory. His estimate that it would take 14 pounds to bring a Canadian steer over here is important. He used this argument to combat the fears expressed that either Irish, English or Scottish raisers of cattle would be driven out of business through competition from Canada. With freights at the present level only the best of Canada's surplus would be likely to be shipped."

Turn First Sod In Irrigation Scheme

Work Commenced on Big Project at Lethbridge.

Lethbridge.—Amid a downpour of rain the ceremony of turning the first sod in the Lethbridge Northern Irrigation project took place at a spot on the line of the main ditch just north of Lethbridge.

Lieutenant-Governor Brett and Premier Stewart officiated, and other members of Federal and Provincial Parliaments were in attendance. Active work has commenced on the big project, and the majority of the earthwork will be completed this season.

Finishes Journey Across Continent.

Vancouver.—Charles Burkanan, transcontinental walker, has arrived here 149 days after leaving Halifax. Burkanan, who is only 30 years of age, was born in Whitewood, Sask. His parents reside in Port Arthur.

During the past week the Rehans, father and son, and Mr. and Mrs. Dill, have arrived in Vancouver, having walked the entire distance from Halifax.

Trail Smelter Receipts.

Nelson, B.C.—Receipts at the Trail Smelter for the week ending June 14, were 7,795 tons of ore and concentrates, bringing the figures for the year to date to 190,701 tons. Of this total, properties of the Consolidated Mining and Smelting Company supplied 188,146 tons.

Will Oppose Renewal Of Anglo-Japanese Treaty

Said That Premier Meighen Will Use His Influence to Have Treaty Renounced.

London.—The advisability of renewing the Anglo-Japanese Alliance, a question in which Canada is vitally interested, will be the first subject before the conference of Prime Ministers in session here.

Premier Hughes, of Australia, interpreting the public sentiment of his country, will urge renewal, but Premier Meighen is almost certain to throw the whole weight of his influence toward having the treaty denounced. The Canadian premier was willing to support a renewal of the Alliance providing it could be shown that such renewal was necessary to British interests, but it has become clearer that no vital empire interest is involved and there is a strong sentiment in both Government circles and in the press, against the treaty, he has practically determined to fight against renewal to the utmost of his power.

The Premier of Canada will base his opposition to the treaty on three grounds: First—That the reasons which made it necessary in 1911 have since disappeared.

Americans Supporting Admiral Sims

Secretary Denby Receiving Letters From Different States.

Washington.—A new factor has entered the list on behalf of Admiral Sims and as a result belief grows here that he will either not be punished for his famous "Jackass" speech when he returns, or merely be given a formal reprimand which will be of little account.

Great numbers of letters are pouring into congress from different states, the greater number of which are reported by congressmen to be favorable for Sims. Some letters from the middle west are even declaring for Sims for president in 1924. This flood of letters will make it difficult for Secretary Denby to take any severe action it is believed here.

Frenchman Discovers Valuable Serum

Will Render Cattle Immune to Foot and Mouth Disease.

Paris.—The discovery of a serum rendering cattle immune to foot and mouth disease has been made by Professors Vallee and Carre, of the Alfortville agricultural research laboratory. This announcement was made to the agricultural commission of the senate by Senator Beaumont.

The discovery is the result of years of experimenting with blood and microbes in order to make possible the fixation of bacilli of foot and mouth disease which is so infectious that it could not be retained in the smallest of filters. Once this was accomplished it would be possible to cultivate the germ. Fixation now has been accomplished, and the serum has been made in small quantities.

Immigration Laws Cause Congestion

Three Thousand Emigrants Stranded At Port of Antwerp.

Antwerp.—The new United States immigration laws are causing congestion at the port of Antwerp, especially as regards Poles, a number of whom are being left behind by each steamer and are unable to find shelter.

The steamer Kronland which sailed June 12 was unable to take 850 emigrants and carried only 30. There are now more than 3,000 emigrants here virtually stranded.

Japan May Evacuate Siberia.

Riga.—A despatch from Moscow to the newspaper Novyput, official Bolshevik organ here, says Japan has decided to evacuate Siberia, according to advices from M. Youin, foreign minister of the Far Eastern Republic at China.

French Aid In Silesia.

London.—A dispatch to the London Times from Opatowa says there is evidence that the French are using greater influence in clearing the disturbance area.

Treaty Money For Indians in North

Edmonton.—The Indian treaty party distributing government money to the Mackenzie River natives comprises six men, with H. A. Conroy at their head and will be in the north till the end of August. The party is travelling on a house boat towed by the Hudson's Bay power boat Hubaco. Side trips will be made up some of the smaller streams by canoe. About \$10,000 will be paid out in treaty to the Indians north of Fort Providence. The money was sent ahead to Fort McMurray in care of the Hudson's Bay Company and is now being taken with the party for disbursement along the way. The itinerary of the treaty cashiers will extend to Fort McPherson, at the end of the line, this being the first time that the Mackenzie River tribes have ever been included in the scheme.

Would Be Serious Matter

Invalidation of Grain Act Would Make Chaos in Canada.

Moose Jaw.—A chaotic condition of affairs would exist in the country should the Canada Grain Act be found ultra vires, is the opinion expressed by Justice Hyndman, chairman of the Royal Grain Inquiry Commission. In discussing the legal status of the commission and the Grain Act, His Lordship pointed out that the situation would be similar to that which would exist should the Temperance Act be found unconstitutional. In such event, any person who wished to would be able to peddle whiskey without interference from the law. If the Canada Grain Act was found to be ultra vires of Parliament, this condition would obtain in the grain business. His Lordship intimated that he considered it possibly the most serious situation which had confronted Canada for a long time.

Airplane Treaty Has Been Violated

Entente Will Seize Military and Commercial Machines.

Paris.—Although the Allied experts have not agreed as to what is the difference between military and commercial airplanes, the ambassadors council decided that Germany has violated the treaty stipulations regarding airplane construction and as a penalty the Entente will seize practically every airplane existing in Germany.

The ambassadors instructed the inter-allied command to seize all military machines and then 25 per cent. of the commercial planes as a punishment to Germany for violation of the construction restrictions. The remaining 75 per cent. of the commercial machines will be seized and held temporarily until Germany complies with the execution of all the aviation clauses in the treaty.

Perfect Score In Intelligence Test.

Seattle.—Michael John Nolan, 41, Canadian war veteran, who recently made a perfect score in the army alpha intelligence test, a test equaled by the million or more who took the test during the war, was again in the limelight when he surpassed all competitors in the "short gun" intelligence test of 180 questions intended to reveal the candidate's mental ability. He made a perfect score.

German Army Law Amended.

Berlin.—The Reichstag passed a bill amending the army law in accordance with the demands of an ultimatum of the allies. The chief change is that the law now expressly states that the army shall consist of 100,000 men, including a maximum of 4,000 officers and officials with the rank of officers.

Britain Sends Warning To Turks.

Constantinople.—The British have warned the Turkish Nationalists that any attempt to take Constantinople will mean war with Great Britain. The purpose of sending a British brigade from Malta to relieve the Greeks at Ismid is to frustrate any such Nationalist attempt to occupy Constantinople.

Printers Strike Money.

Toronto, Ont.—Eighteen thousand dollars in strike money was handed out at the Labor Temple to members of the Typographical Union on strike. Married men receive \$23 a week, single men \$20 and apprentices \$12. Union leaders report that seventy employers have signed up with them conceding the forty-four week.

King Alfonso and his second son, Prince Jaime, have gone to London for a short visit.

Re-Elected By Acclamation

Hon. C. A. Dunning, Provincial Treasurer, who was returned by acclamation to represent Moose Jaw County in the Saskatchewan Legislature.

B. C. Would Restrict Japanese Immigration

Victoria.—The Provincial Government, through Premier Oliver, has forwarded to the Rt. Hon. Arthur Meighen in London, a cablegram strongly urging that any renewal of the Anglo-Japanese treaty should preserve to Canada the right to restrict Japanese immigration, something which the existing treaty does not stipulate. In connection with this subject, Hon. E. G. Barrow, minister of agriculture, has collected data showing to what extent Japanese and Chinese are engaged in the business of agriculture and horticulture in this province. This information has been forwarded to Hon. Dr. Tolmie, who accompanied Premier Meighen on his mission to England.

Greek Offensive Beginning

British Reserves Relieving Division On Sea of Marmora.

Constantinople.—Opening of the Greek offensive against the Turkish Nationalists in Asia Minor is believed to be imminent. British reserves are relieving the Greek eleventh division at Ismid, on the Sea of Marmora, which is proceeding to the Ushak front, near the Baghdad Railway, northeast of Smyrna.

The allied high commissions here have authorized the Greek fleet to operate from Gallipoli, at the southwestern end of the Sea of Marmora, up through the Bosphorus and along the Black Sea to Bakum on the Georgian coast. The Greeks have assigned to this work a squadron consisting of 25 warships.

A Farewell Gift

Wives of Cabinet Ministers Present Gift to Duchess.

Ottawa.—The wives of the federal cabinet ministers presented as a farewell gift to the Duchess of Devonshire, a silver casket with the Canadian coat of arms enamelled thereon and lined with gray satin. The presentation was made at Government House by Lady Foster, wife of the acting premier. Lady Foster expressed the regret of the cabinet ministers' wives over the departure of Her Excellency and their appreciation of "the tender sympathy shown during all the times of storm and stress through which we have passed together."

No Complaint Against B.C. Salmon.

London.—Rt. Hon. Sir F. Mond, minister of health, referring to the gift of salmon from the British Columbia Government during the war, concerning which criticisms have recently been published, declared it was inspected by officials of the ministry, who also undertook its distribution and found it entirely satisfactory. No complaints were ever received from participants in the gift.

Ice Cream Is Luxury.

Ottawa.—In a judgment issued, the Board of Railway Commissioners refused the application of the manufacturers of ice cream that this commodity should be placed in the second class for express purposes and not in the first class as at present. In rendering his judgment, Chief Commissioner F. B. Carvell declares that ice cream is essentially a luxury.

Old-Time Yarns in the West

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

I was managing the Fairford Post of the Hudson's Bay Company in the winter of 1874-5 and was fortunate enough to own a splendid train of dogs that I have mentioned in former sketches. Mr. Isaacs Cowie at Manitoba House was my immediate chief and at his request I took a young sleigh dog to train with my own as these had a peculiar fast slinging trot which covered the ground in an amazing way.

I had occasion to visit Manitoba House, or the Post as it was commonly called, and started early one morning in the dead of winter, hitching up the strange dog with my own. As I was taking a carole and travelling light, I intended riding all the way and dressed very warmly accordingly. My dogs were not at all pleased with the interlude and quite often would give him a sly nip behind, to which he would naturally retaliate, and this made the train go even at a faster pace than usual. We were about fifteen miles out from Fairford and well on towards the centre of the frozen lake, when feeling tired and cramped I called a halt and got out of the carole for a few minutes to stamp about and bring the circulation back. Turning my back on the dogs for a minute I heard a dash of bells and off they went in a flash, fortunately in the right direction.

Running at top speed, I managed to keep near them for several miles, but noted with astonishment they were gradually gaining ground and I was blown, also sweating profusely, as I had far too many clothes on for a dog-runner. I stopped and resud a minute or two, then taking off my heavy coat jogged along at a steady pace. But gradually the train drew further and further away until lost to sight, and then I had only the marks of their claws on the hard drifted snow for a guide, and even these gradually disappeared as some light snow was falling. My hard running at the start had been too much and then it was a long time since breakfast and naturally all my grulks were on the sleigh. I began to feel very much exhausted, and an overpowering desire to rest at any cost came over me. Placing my capot on the ice I lay down on my back and stretched out my arms. My eyes closed and I verily believe I would have been fast asleep in two minutes, but I found my right hand holding something and on looking it to my sleep eyes, lo and behold, it was a little frozen mouse, one of the kind with long noses. Goodness knows how he ever had got out here at least twelve miles from the shore, but on gazing at him a sudden conviction came over me that if I once fell asleep I would be like the mouse in a few long frozen stiff. With that I stillly regained my feet, piled up my heavy coat, muffer and mittens on the ice and started for the Narrows at a steady trot.

Provisionally for me an enterprising Yankee has built a log cabin right in the centre of the right-of-way of the old Canadian Pacific location which, as old-timers will remember, had decided on this route. This cabin I struck just about sundown and I was about all in, no food during the day, the overheating in the morning and now chills had come on and my legs felt like lead at the door, so I ran against it, and on its opening, collapsed on the floor. Like all pioneers I was extremely hospitable, and taking off my outer clothes placed me in a warm bed, rubbed my limbs and gave me small doses of whiskey and water, so in a short time I was able to sit up and eat some supper.

Next morning I was at the Post bright and early hoping to find the dogs there, but no signs of them. We at once sent out a search party as there was some valuable furs at the back of the carole, a sly fox amongst them, but the searchers returned in the evening, reporting no luck. Several days elapsed and I was disconsolate, as parties had been out daily but could find no trace of the dogs. One evening, as I was looking out over the lake, I saw a dog-train coming in from the northeast at an unusually fast rate and calling Cowie to bring the field dogs we soon decided they were the missing dogs, but as they reached the landing there were only four, the stranger having disappeared.

A young Indian was riding in the carole and told the following story: "I went out on foot to visit a line of wolf traps and on getting near the last one on the east-side of the lake I noted some large animals walking round it. When they caught sight of me they came tearing in great bounds and thinking they were wolves I prepared to defend myself with an axe (they were afraid of a rifle). But when I saw they were dogs I then knew these were the train that had ran away from Oge-mas, and my, but they were glad to see me and licked my face and hands. On going up to the carole I found Mr. Cowie's dog in my trap with a solitary frozen foot and the harness still on him. So, as he would be of no further use, I knocked him on the head for wolf bait."

On examining the dog harness I noted that three of the belly bands were chewed in half, and on his telling this I at once realized what had happened. Nero, my second dog, was a slim, thin haired creature with a very small head and could get out of his traces at any time my simply slipping the collar over his head. Then he apparently had to work and leaving his brothers one by one, released the unfortunate stringer to his own devices.

Airmen Block Smugglers

Official Announcement State Mexican Aviators Doing Good Work.

Mexico City.—Mexican aviators patrolling the Rio Grande border are declared to be doing good work in the apprehension of smugglers according to an official announcement. They are keeping up a rigid inspection from Piedras Negras to Matamoros. To date most of their captures have been persons bringing tobacco into Mexico.

Rotarians at Edinburgh

Many Countries at Rotary Convention Held In Scotland.

Edinburgh.—It was reported at the annual convention of the International Association of Rotary Clubs, that there were represented at the session 669 clubs from the United States, 33 from Canada, 31 from Great Britain and Ireland, 5 from Cuba, 3 from South America, and 1 from India.

Prior to the beginning of the business session, Frank Weedon, of New York, led the delegates in the singing of popular songs, thus upholding the unconventional nature of the assembly.

B.C. Forest Fires.

Victoria.—Forest fires in British Columbia during the last week brought up the total for the season so far to 138, according to the report of P. Z. Caverhill, chief forester.

New Rotary President.

Edinburgh.—Dr. Crawford C. McCullough, of Fort William, Ont., was unanimously elected president International Association of Rotary Clubs now in session here for the ensuing year.

France Hindering

Silesian Adjustment

Lack of Co-operation is Producing Serious Situation.

London.—Great Britain, in a further communication to France on the Silesian question delivered through Lord Hardinge, British ambassador to France, calls attention to co-operation in the restoration of order in Silesia, and declares that the lack of concerted action is producing an increasingly serious situation. Great Britain suggests that all the British troops in Silesia be placed under British command which would involve the relinquishment of French military control at some points. It is explained that this would have the effect of freeing more British forces for independent action.

Raising the Standard

Manitoba May Insist on Higher Qualifications For Teachers.

Winnipeg.—A movement has been launched to raise the standard of education in Manitoba by insisting on higher qualifications for public-school teachers. A couple of years ago the province was short of teachers. Today, according to those in touch with the situation, there are plenty to go round.

Under these circumstances it is believed the time is opportune to raise the standard.

German Haircuts Up.

Berlin.—Germany is being forced into an alliance with the Bolsheviks, Berlin barbers are to blame. They announce that on account of high labor cost, price of haircuts and shaves will be boosted 20 per cent.

THURSDAY, JUNE 23, 1921

Vancouver and Victoria Welcome Newspaper Publishers

Considerably more than half the Weekly Newspaper Publishers, numbering 477 members met at Vancouver on June 9-10, to hold their annual convention, and were given one of the best times of their lives by the British Columbia people.

Ye editor and his wife, who were one of the party, travelled on the Canadian National Railway to the convention. Boarding that beautifully equipped Transcontinental train at 11.50 at Edmonton June 3rd, arriving next morning at Jasper amid the beautiful mountain scenery. From Jasper to the coast is one unending panorama of snow capped mountains, lakes, canyons, forests and mountain streams. What appeals most to the traveller, is the wonderful engineering feat of building a railroad through apparently impenetrable mountain wall. At Jasper may be seen some of the highest mountains in the Rockies. Mount Robson is the highest peak in Canada, and so that the traveller may get a good view of the giant mountain the train stops for a few minutes. In going through the Rockies for the first time, one is thrilled by sense of wonder and awe. The sunsets were glorious and the snow-capped sentinels will be lifelong memories.

The officials of the Canadian National Railway, over whose line we travelled, treated the passengers with the utmost courtesy, and added in any way they could to the travellers' comfort. On the first day of the convention the members of the Weekly Newspaper Association were entertained by the Canadian Club to a luncheon held in the Vancouver Hotel, while their wives were the guests of the Vancouver Branch of the Canadian Women's Press Club at the Hudsons Bay, and a corsage bouquet as favors were placed by each plate. Then in the evening all the members and their wives enjoyed a clam-bake on the shore west of Jericho beach. This entertainment which was arranged by the B. C. Institute of Journalists, was an event which will long be remembered by the delegates. The clam-bake was followed by a vaudeville entertainment, and community singing led by the Vancouver Kiwanis club. During the picnic the guests were entertained by selections of music by the 7th Battalion band. After the meal the guests moved along the beach and were entertained by Fred Couchers' Concert party. The visitors were given a souvenir in the form of a clam shell polished, and bearing the name of Vancouver and date, and gaily beribboned.

On Friday evening the visitors and their wives were taken for an automobile ride through Stanley park and along Marine drive, winding up with an entertainment at the Capitol Theatre, where they were the guests of the management.

For the above splendid entertainment thanks are due to acting Mayor Owen, of the City of Vancouver, Reeve Lembel of Point Grey, J. C. Cram, of the Kiwanis club, the Mission Cafe, C. H. Jones and Co., and many others. The wild grandeur of Capilano Canyon, Stanley Park with its quaint traditions, the pleasures of the sea-side and the profusion of flowers, the possibilities of this wonderful city are unlimited. Vancouver is a perfect revelation. On Saturday morning through the courtesy of the C. P. R. the party were taken over to Victoria on the beautifully equipped boat, "Princess Charlotte." On their arrival at Victoria they were given a hearty welcome by acting Mayor Sangster, Commissioner Thompson of the Development Association and others. The program which awaited us

"THE BEAUTY DOCTOR."

—Kittener for the Western Newspaper Union

there was a visit to Gordon Head Strawberry gardens and through some of the most picturesque scenery in Victoria, also visiting the famous world Observatory.

On Sunday the delegates left the Empress Hotel in cars furnished by local people for a visit to the World-famous Butchart Gardens. To anyone visiting Victoria, we would say don't fail to see these beautiful gardens. Words fail to express their grandeur. It is simply "Fairy Land." From Butchart Gardens, the party was taken to Sydney, across the Saanich peninsula, thence by way of Keating, where the Saanich Fruit Growers' Association met the party and presented each member with a box of luscious strawberries.

Victoria is a beautiful city and to an Englishman a visit to Victoria is a glimpse of Old England with its magnificent residential section along the famous Rockland Avenue. Victoria has 65 miles of trees and grass lawns, and the total area of the city boulevards is 3,799,660 square feet.

The party returned on Sunday afternoon to Vancouver on the Princess Victoria, where the delegates left for their homes, feeling that their trip was beyond all expectations, and inspired with the wonderful beauties of our country. Canada—and seeing, know of what they speak.

NEW SERIAL STORY STARTS IN ADVANCE

"Oh, Money! Money!" a new novel by Eleanor H. Porter, will be commenced as a serial story in an early issue of this paper. Eleanor Porter is well-known as the author of the Pollyanna Books, "The Road to Understanding" and "Just David." "Oh, Money! Money!" is a splendidly constructed story and full of excellent character study. Do not miss the opening chapters of this serial. If not already a subscriber to this paper, send along your subscription now, so that you may receive the paper containing the first instalment.

SNAPPY FEATURES

FOR CALGARY FAIR

In the program which will be presented at the 1921 Calgary Exhibition to be held June 30 to July 8, the management considers it has the highest class and most entertaining features that have ever been secured for the Calgary Exhibition.

An attraction which undoubtedly be the most popular for many years is the massed Festival Choir of 200 voices, composed of the five Calgary choirs which competed in the recent Alberta Musical Festival.

The live stock and industrial exhibits this year promise to be exceptionally good, and the prospects are particularly bright for the best all round exhibition that has ever been held in Calgary.

Now's the time to paint that car. We have Effecto Auto paint Top Dressing and Body Polish. See us for prices.—The Service Garage, Chinook.

West's Wonderful Future When Agriculture Possibilities Have Been Fully Developed

Much has been written regarding the achievements of Western Canada as a prime wheat growing region, supported by ten years of uninterrupted success in securing the world's premier honors for this cereal in contest with the first growers of the American continent. The west has become justly renowned for its grain production, and instead of the cattle-dotted prairie which the mind conjured on mention of the western plains, the imagination now pictures a sweeping vista of miles of surging waves of golden tossing heads justifying the appellation of "Granary of the Empire." The prominence given to a successful wheat growing is apt to suggest a specialization and exceptional achievement, but the versatility of Western Canadian production was very ably illustrated at the last International Livestock and Grain Show held in Chicago in 1920, when out of twenty-five prizes, Canada secured twenty-one, including the premier trophies for wheat, oats and Clyde-dale horses.

The prominence wheat receives may overshadow the production of other cereals to the exclusion of the successes they have also achieved in the international field. Yields of 120 bushels of oats to the acre have been recorded in Western Canada and one hundred-bushel yields have ceased to cause comment. In point of quality, it might be mentioned that the \$1,500 trophy for oats presented by the State of Colorado was won four times successively by J. C. Hill & Sons, of Lloydminster, Alta.

To take the successes of the last five years. In 1916, at the International Soil Products Exposition at El Paso, Texas, Alberta oats was awarded the sweepstakes, and later, when the same exposition came to be held at Peoria, Illinois, Alberta dropped one place, securing the second prize whilst the premier honor was divided between her sister provinces of Manitoba and Saskatchewan. In 1918, when the International Exposition was held at Kansas City, Manitoba secured the ascendancy over its sisters and carried off the first three prizes for oats as well as the sweepstakes for the same crop. In 1919, one of the years in which the wheat championship went to Saskatchewan, it also secured the premier oats honor with first place and sweepstakes. Coming right up to 1920, at the International Livestock and Grain Show at Chicago, J. C. Lucas, of Cayley, Alberta, brought the world's oat championship to his province. In the past five years, Alberta has secured the oat sweepstakes twice, Manitoba and Saskatchewan once each and divided it once. Never once has it left the boundaries of the three prairie provinces.

Barley, which is the other cereal in the production of which Western Canadian farmers have entered largely and pitted their crops against the best of the continent, rival oats in its list of awards. For four successive years at the exhibitions of the International Dry Farming Congress held respectively at Lethbridge, Alta., Tulsa, Okla., Wichita, Texas, and Kansas City, Mo., the first prize was secured by an exhibit of Western Canadian barley. To follow this year, Manitoba carried off the first three prizes for this crop in 1918.

Taken in conjunction with the wheat records this is a truly remarkable showing, giving Western Canada nearly every cereal honor for a number of years against the competition of the world's first farming areas. And when it is considered that the huge tract, which includes the farms which raised these champion crops, is yet to a great extent undeveloped, the achievement is still more remarkable and augurs a wonderfully productive future for the time when ever growing settlement shall have broken up the waiting millions of fertile acres.

Mechanical Flies

Shows How Common House Fly Carries Infection.

Mechanical flies are the newest thing in health education. Officials of the Bureau of Public Health have devised these flies in order to demonstrate the manner in which the house fly carries infection. The mechanical fly shows how efficiently the fly gathers up germs and carries them along with them, finally passing them on where they find the most harm.

Awarding Contract For Irrigation.

The awarding of a contract for removing 6,000,000 cubic yards of earth from the fifty miles of ditch of the Lethbridge northern irrigation district is announced. Completion of the contract will bring under irrigation 105,267 acres of settled country.

French See

German Menace in Air

War Organization Maintained Complete and Could be Quickly Mobilized.

General Hirschauer who, during the war was Air Commissioner for France, has written an article on the Development of Aviation in Germany. He sums up the conclusions of his article as follows:

"Today German air action could be only a simple replica of what was done during the war. We are stronger than Germany in the air, and we are stronger than she is on land. In a short time the situation can change, for Germany is working and has preserved intact her means of production. She wishes to develop her air power, and is putting, and will put in, all the necessary activity.

"To meet the danger we should maintain our air forces in activity, largely develop our means of commercial air transport, and maintain a military aviation force that is always mobilized, and an air defence force on the spot. We should take away from Germany all facilities to arm without ruining the State, and centralize those of our finances that that are devoted to national defence. We should bring to our air military resources that would be derived from other armies, and we should modify the conditions of foreign policy. The custody of the Rhine is not sufficient.

"The conclusions of General Hirschauer are interesting, as showing that France is very thoroughly alive to the menace of German aviation.

An Advertising Artist

Organ-Grinder Did Not Let Good Chance Slip.

Some men never let an opportunity slip. They make the most of every chance. As, for instance, a certain organ-grinder who once played his organ outside the house of Mascagni, the famous composer. Mascagni is often driven wild by hearing his music "murdered" on piano-organs, and on this occasion he left his house and interviewed the street musician. He did not send him away. He merely took the handle of the instrument, turned it around faster and quickened the tune. The organ-grinder smiled his thanks. Next day he again appeared in the street. This time his organ bore a large placard on which was inscribed: "Pupil of Mascagni."

Sheep Raising

At Fort Vermilion

Conditions Reported Good for Sheep in Northern Alberta District.

W. J. Stark, secretary of the Alberta Provincial Sheep Breeders' Association, has received a very interesting letter from W. H. Russell, of Peace River, who has a flock of sheep at Fort Vermilion, and who has just joined the association for the purpose of marketing his wool through the annual association sale.

In his letter, Mr. Russell says he has a very difficult time getting sheep to Fort Vermilion; they were taken in snows last fall, but wintered exceedingly well; out of a hundred and eight head, only two were lost during the winter. Some lambs born in February weighed, on May 15th, forty pounds each. Mr. Russell states that so far they have had no trouble with wild animals, which is much more than many farmers can say who live much closer to the centres of civilization than Fort Vermilion.

Surprised the Bishop.

A bishop saw one of his parishioners clinging to a bus-stop.

"William, William," said the Bishop. "Can it be you?" How often have I preached to you? Sermon after sermon I am so sorry!"

After which he walked dejectedly away. But presently the voice of the intoxicated person reached him and he turned back in the hope of hearing a word of reformation.

"B's'n'p," said the man, "if you really are sorry, I forgive you."—London Tri-Bits.

Pioneer Days In The West

Early settler hauling load of poplar poles with the aid of his trusty yoke of oxen.

People of India Offer Human Sacrifices

Attempt of Troops to Rescue Woman Causes Riots.

A government report on the serious riot which took place recently in the village of Strichir, in the Rajputana agency, states it was caused by the offering of human sacrifices. During the disorder seven persons were killed and ten were wounded.

The village, which is the home of many members of the ancient sect of the Charays, became greatly excited over the refusal of the Charays to pay the usual revenue contribution. Sepoys were sent to enforce collection, and found the Charays had followed traditional methods of bringing the vengeance of heaven upon the state by burning an old woman alive. She had been placed upon a pyre, which was lighted by her nearest relatives. When the troops attempted to rescue the victim, the villagers opposed them with knives and swords, wounding several soldiers. The Sepoys thereupon fired a volley into the crowd, which scattered, but the attempt to rescue the woman came too late to save her.

British Columbia Fruit

Conditions For Fruit Grower Are Ideal This Season.

The first ripe strawberries (Marshall) were picked at Gordon Head, Vancouver Island, on May 26th. The rainfall for May was above the average and was of great benefit to the berry crop. The fruit setting has been exceptional and the fruit is very uniform. Raspberries are looking well.

Conditions in the Okanagan generally are good. In the Kereones section apples are well formed. Pears are dropping rather heavily in some orchards, but the crop on the whole will be good. Tomatoes and other truck crop are looking well, although the acreage is much smaller than last year.

Apricots are sizing up well in the Kaledon section and will require quick heavy thinning, sweet cherries appear to be light. In the Penitence and Dog Lake sections sweet cherries and peaches promise to be only fair to light, apples have set well around Summerland in most all varieties. The cherry set is lighter than last year.

Autos to Make Own Fuel

Edison's Son Predicts This Within Few Years.

A prediction that automobiles within a few years would carry individual stills to produce fuel for their operation was made by Charles Edison, son of Thomas A. Edison, in an address at Boston. He declared he had himself been seeking a substitute for gasoline for ten years. The problem would be solved, he said, by the manufacture of individual distilleries to be attached to the cars, the still to be operated by the heat and motion of the motors, and to produce from petroleum and other ingredients a combustible mixture supplied as constantly as current is generated by electric cars while in motion.

A car of average power, in his opinion, could be equipped to produce sufficient fuel to run itself and enough by-products to pay for its maintenance.

Australia Does Not Want Immigrants

London.—Interviewed in regard to the condition of industry from world depression, Premier Hughes of Australia said that the commonwealth had not been unaffected and, therefore, there was "very necessity of means to prevent a difficult labour situation arising in that country.

He was unprepared to encourage a larger number of immigrants than the commonwealth could absorb.

To Learn Railroad In Canada.

A party of students from the universities in China recently arrived at Victoria. They have come to Canada to study modern methods of railroad management.

A Library For Every Farm Is The New Slogan For Prairie Provinces

France Discusses Naval Program

May Abandon Battleships For Submarines and Destroyers.

In presenting France's programme of naval construction for the next three years, Deputy Paul Denise, reporter for the navy commission, advocated, in the chamber of deputies, the virtual abandonment of the building of battleships and battle cruisers and intensification of construction of submarines, torpedo boats, destroyers and aeroplane carrying ships.

The programme provides for the construction of 6 light cruisers, 12 destroyers, 12 torpedo boats and 36 submarines, at an approximate cost of 1,416,000,000 francs.

M. Denise asked the chamber to vote for the transforming of five battleships, work on which was stopped during the war, when the hulls were completed, into aeroplane motor ships.

He refused to be drawn into a discussion as to whether he agreed with the British admiral, Sir Percy Scott, that the day of battleships was past, but quoted Rear-Admiral Sims, of the United States navy, and also Admirals Beatty and Jellicoe, of Great Britain, and Von Scheer, of Germany, as having a different opinion from Admiral Scott.

He pointed out that France, as a pacific nation, needed a navy for coast defence, not warships for offensive action, and said there was nothing to fear from Germany. France had no desire to attack any other nation. The principal reason for the abandonment of construction of battleships by France, he added, was the realization that France could not keep up the peace with Japan, England, and particularly the United States, which were building more units than before the war.

Lions Charge Auto

Thrilling Experiences of U.S. Naturalist While Taking Cinema Pictures.

Mr. H. A. Snow, the American naturalist, has had a thrilling experience just outside Nairobi while obtaining cinema pictures and specimens for the Oakland Museum, in California.

He had stationed his photographer on a convenient hummock, and was himself heating the game up to the camera by driving round in a car, when he struck a party of five lions, he stopped the car and fired, but missed, and two of the animals charged.

Mr. Snow immediately reversed and raced away, but the two animals kept pace a short distance behind. The hunter was suddenly horrified to find that a third lion had made a detour and was waiting for the car to come up.

When within a few yards the third lion sprang, but the driver caught the vehicle to swerve, with the result that the beast hit the side of the car and rolled off.

The naturalist was beginning to leave the other two animals behind when the car hit a stone and he was flung out. This frightened the lions, and they made off, though Mr. Snow succeeded in shooting them later.

Daylight Saving in Vienna

Workmen Object to Law Being Rescinded For Farmers.

The daylight saving tactic is becoming embarrassing in Vienna. Yielding to the farmers, the law was rescinded but the workmen in Vienna are taking it into their own hands and simply serving notice on employers that they will work on summer time. The movement has spread from factory to factory until it is virtually a law in its effect. The men say they cannot work on clock time and cultivate their gardens around the city.

A Man's Man.

"The Dominion of Canada is pleased at the choice, for Lord Byng is essentially a man's man, in the prime of life, and with the reputation for much tact and good sense. How a soldier and a statesman will take to the police and innocuous duties of a governor-general remains to be seen."—Detroit News.

Spanish Peasants Use Queer Light.

The cork oak grows plentifully in Spain, and the peasants make use of the bark to light their houses at night. The bark is placed in a kettle, from which protrudes a spout, and when it is hot enough it gives off a gas which burns with considerable brilliancy.

"A Library for Every Farm" might appropriately be adopted as the motto of the Agricultural Extension Service of the provinces of Alberta, Saskatchewan and Manitoba, which attempt to circulate the best in literature throughout the rural districts, and further education as well as foster greater interest in the social aspect of farm life.

Agricultural countries like Canada and the United States have always with them a subtle, half-exposed problem in the inherent tendency of the youth of the farm to be drawn to the bright lights and the allurements of the city. It is not that farm work is any longer the drudgery of the pioneers, for modern machinery has largely removed the arduous element from present-day farming, whilst the man with a successfully operated farm is now often the envy of the business and professional man. But the natural drift of youth is to imagine that which he has not surpassed those things which surround his everyday life, and to the youth of the farm the city's attractions, its theatres, its crowds and hostile sentimentality are desirable to live among. It is exactly the same attitude which makes the city-bred youth turn to the country fields and pastures and find such pleasure in the quiet and solitude of pastoral life.

And so men who have most clearly realized this drift and its causes, and seen the national danger it constitutes to a country whose foundation is the pursuit of agriculture, have devoted great energy to bringing to the youth to stay on the land, and have found the most effective remedy to be in furthering the pleasures of rural social life and bringing some of the things of the city to the country.

In Canada, the government has taken a hand in this, and by introducing many novel features of social life, and offering facilities for others, plays an important part in bringing to the young men and maidens of the farm, a realization of the large future they hold to themselves and to the nation. Lecturers travel the provinces and deliver talks on a variety of subjects; school gardens are subsidized and encouraged; competitions for boys and girls are held in connection with all agricultural fairs; farm literature of every possible subject is available for the asking. In every conceivable manner the provincial governments show their appreciation of what the farm youth means to the country.

One of the keenest and most widely enjoyed pleasures of the country, especially in the winter season, is reading, for here there is oftenest the leisure and the desirable state of enjoyment. Books in rural districts take the place of many other and often less desirable and instructive means of enjoyment. Reading under the circumstances becomes study, for matter is well meditated and digested. Unfortunately, there is often one drawback, the availability of literature. Frequently a farmer is not in a position to collect a library of his own, and if a city's facilities for borrowing books cannot be carried into the country districts. This question of supply, the provincial governments set out to solve.

Under the system as evolved by the Agricultural Extension Service of Alberta, Saskatchewan and Manitoba, a rural community has but to make an application and a compact folding case containing fifty volumes is sent to them. These books cover a wide variety of subjects with a substantial proportion of fiction. The books are circulated among the different farms, and when read are returned to the bureau whereupon a new library comes along.

This system of travelling libraries is doing a splendid work both in heightening the social life, and in furthering the educational status of the farm population of these provinces. The best books only are to be found in these libraries, and careful plans are laid for the cultivation of desirable literary tastes. Whereas at first ninety per cent. of the volumes are fiction, this proportion is gradually decreased, and the deficit made up of more valuable works of economic thought.

Canadian Warships At Los Angeles.

Los Angeles, Cal.—Three Canadian warships, the cruiser Aurora and destroyers Patriot and Patriote, anchored in Los Angeles harbor en route from Vancouver to Halifax. The Aurora fired salutes to Fort McArthur and to Admiral Williams, aboard the flagship New Mexico of the Pacific fleet. The Canadian ships will be in port several days before proceeding to Panama.

Eggs in the Diet

BY LORETTO C. LYNCH
An Acknowledged Expert in
All Matters Pertaining to
Household Management.

Though eggs are cheap, whenever we suggest them as a substitute, someone is bound to remark: "But one grows so tired of eggs, boiled, scrambled, fried!"

But there are lots of ways of introducing eggs into the diet besides using them as a main dish. Beginning with soup, have you ever tried egg in soup? Suppose you have a clear soup. Like all clear soups it is probably lacking in any degree of real food value. Beat an egg slightly and add to it a pinch of salt and one-fourth cup of flour. Thin to the thickness of a drop batter with a little milk or water. Let it drop into the soup from the teaspoon a little at a time. The soup should boil a few minutes.

For the salad course, eggs may be used if they have not made their appearance earlier in the meal. Hard cook some eggs, remove the yolks after the eggs have been peeled and cut into half lengthwise.

Mash the yolks with a little dry mustard and either oil or melted butter and any other seasoning. Pack the mixture back into the whites and arrange on a bed of watercress or lettuce. Garnish with strips of brilliant pimientos (rinsed red peppers).

If you decide to have eggs for the main course, try a Spanish omelet. Put one measuring cup of tomatoes into a saucepan. Add about three rounding tablespoons of Spanish onion chopped, half a chopped green pepper, two rounding tablespoons of chopped pimientos, half a teaspoon of salt and a bit of butter or a tablespoon of olive oil. Cook slowly about fifteen minutes or until the peppers are very tender.

Rub a mixing bowl with a clove of garlic and then remove it. Into the bowl, break six eggs. Beat sufficiently to just mix whites and yolks well. Make into an omelet on a well greased hot pan. Just before folding, spread the tomato mixture which should be hot. Serve at once.

A woman asked me for a good cake recipe that would not cost too much. Figuring on the cost of eggs today, I suggested to her an Old Fashioned Sponge cake calling for five eggs. The woman looked at me and said: "Why, I could not afford to waste five eggs in a cake." She seemed to be under the impression that if you put eggs into a cake, the food value of the egg sort of automatically disappeared.

Figuring eggs at two-and-one-half cents a piece, five would cost less than thirteen cents. If you have this sponge cake for luncheon, however, meat or fish is entirely unnecessary. For a simple luncheon, a bread and butter sandwich with, perhaps, lettuce between, a dish of stewed fruit or apple sauce, a piece of sponge cake and a glass of either milk or cocoa, is ideal.

But here is the recipe for this sponge cake. Beat the whites of five eggs until stiff. Beat the yolks in a separate bowl at least ten minutes by the clock with a Dover egg-beater. Then gradually beat into the yolks one and one-quarter cups (measuring) of powder or confectioner's XXXX sugar. Add juice of a large lemon and grated rind of half of it.

Slip the beaten whites into the bowl and sit over them one and one-quarter cups of flour. Cut and fold the whites and the flour into the yolk mixture with a wire egg beater or wire spoon. Pour into ungreased pans or muffin cups and bake about twenty minutes in a very moderate oven. This ought to make four layers or one cake about twelve by fifteen inches. Always bake sponge cake in a shallow (never a deep) pan. If you have space, preserve some eggs in the water-glass solution for sale at groceries and drug stores. The directions come on the

Do Your Ears Buzz?
Have You Headaches?

When your ears ring, your head aches, and you seem slightly hard of hearing, the cause of Catarrh, Mr. J. A. Hamill, writing from Greenmount, P.I., was similarly troubled, and writes: "No one could have worse Catarrh than I had for years. It caused partial deafness, bad taste, upset my stomach, made me sick all over. Catarrh, stopped the cough and gave me a clear feeling in my breathing organs. I am now absolutely well, thanks to Catarrhoxone." Nothing so certain as a Catarrhoxone Inhaler to strengthen a weak throat, to rid you of Bronchitis, to drive out Catarrh, coughs and cold. Sold everywhere, 25c, 50c and One Dollar for complete two months treatment. Dealers, The Catarrhoxone Co., Montreal.

container and if followed give perfect results and prove a great help.

Fund For
Disabled Soldiers

Interest of \$20,000 Can be Used for Forty Years.

Mrs. Alexandra L. Schofield, Toronto, who died leaving an estate of \$361,335, established a fund in her will to be known as the Jack Schofield Fund of \$20,000 to assist permanently disabled soldiers in Toronto for 40 years, after which the principal is to go to the Canadian Institute for the Blind. Mrs. Schofield established two other funds, one of \$10,000 for The Rest Farm where horses of the Toronto Humane Society may go, and another known as the Sarah Price Fund.

Cheap Lands In
Western Canada

Many Americans Are Taking Advantage of Splendid Opportunities Offered.

An idea of the manner in which newer districts are being rapidly settled up may be gleaned from the following clipping from the *Atchison Daily Globe*: "Atchison county is losing a lot of fine young farmers to Canada. George K. Cox has sold his farm in the Deer Creek district, and will go to Canada where he will settle on a new farm in the Battledore district, which was recently opened by the Canadian Pacific Railroad. Jess Chatman, also of the Deer Creek neighborhood, will accompany him. Dudley Chatman, Wilbur Dutton and Will Kelly, who recently went to Canada from Atchison county, also have farms in the Battledore district.

COULDN'T DO HOUSEWORK

HEART SO BAD

Many women become run down and worn out by their household cares and duties never ending and sooner or later find themselves with weak hearts and shattered nerves.

When the heart becomes weak and the nerves strung, it is impossible for a woman to look after her household or social duties. The least little exertion or excitement leaves her in an exhausted condition, and not fit to do anything.

On the first sign of any weakness of the heart or nerves, you will be wise if you take a course of Milburn's Heart and Nerve Pills.

Mrs. Daniel Benanson, Loganville, N.S. writes: "As I was troubled with a weak heart for nearly two years I am writing to tell you what your great remedy, Milburn's Heart and Nerve Pills, has done for me. My heart was so bad at night I could not sleep; I would take something spells, and I was so weak I could not do my housework. I tried two doctors, but got no results. A friend advised me to try Milburn's Heart and Nerve Pills. I have used six boxes, and I am completely relieved. I think they are the best medicine for heart trouble there is."

Price 50c a box at all dealers or mail order direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Then It Happened.
"Sure you would!" mused the Cheerful Idiot.
"Sure you could what," demanded the Wise Guy.
"Why if a couple of deaf mutes are on their honeymoon, you can say that they are unpropably happy can't you?" replied the Cheerful Idiot.

Glass Factory Workers Lose Sight.
Many of the workmen in the glass factories of Venice begin to lose their sight after they have passed their fortieth year, and soon become totally blind. The impairment of vision is caused by the excessive heat and also by the glare of the flames from the glass furnaces.

Four Men Manage
Huge Business

MacDonald Tobacco Co. Shunned Letter Writing and Telephones.

Recent circulation and disproval of an unfounded rumor to the effect that W. C. MacDonald, Reg'd., Inc., has been acquired by the Imperial Tobacco Co., recalls an industrial history which is perhaps the most remarkable in the chronicles of Canadian business. In these days of gigantic corporations (among such the MacDonald Company is to be considered as one of the largest manufacturing enterprises in Canada), we seldom think of a "one-man business" otherwise than as a good prospect for the assignee; yet the MacDonald institution has always been, still is and will continue to be during the lifetime of its present owners, as any rate, a one-man business in the strictest sense of the term.

The largest producers of plug tobaccos in this country, and now among the largest, too, of cut tobaccos, it employs an office staff of five persons! Modern business men, recalling personal experience, may be inclined to scout this statement, but it is none the less true. A business aggregating many millions of dollars annually is transacted by five office employees. This condition, presumably, is a survival of the form of efficiency for which that enigmatic, taciturn business genius, the late Sir William MacDonald, was distinguished. In fact the spirit of the late founder still looms large in the conduct of the company's affairs.

William Christopher MacDonald founded his business of tobacco manufacturer in 1858, and since that time the name MacDonald has been one to conjure with in this country. Because in his later life he consistently refused to take cognizance of such modern adjuncts of business as the telephone, the office building elevator, the automobile, etc., it has been alleged that he was not a progressive individual, but his success affords ample disproof of such a contention—a success unparalleled, perhaps, in the history of Canadian business, a success such as enabled him to be, next to the late Lord Strathcona, Canada's greatest philanthropist. In the person of his secretary he found a talent like to his, and that talent, transmitted to the sons of the secretary, Howard and Walter Stewart, still controls, solely, the business of W. C. MacDonald, Reg'd., Inc., for to these two men Sir William left the wonderful enterprise he built up.

While the Stewart Brothers have recognized the merits of advertising with the result that their company is today one of the largest advertisers in the Dominion, while they have taken cognizance of the automobile and of modern equipment, it is none the less true that the industry they control is still guided, and will be during their lifetimes at least, solely by the spirit and unrivaled commercial wisdom of the late Sir William Christopher MacDonald. Hence, any rumors of the purchase of the business by other interests are at once untrue and illogical.

Requisite on the Farm—Every farmer and stock-raiser should have supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colds it far surpasses anything that can be administered.

Ore Sent To California

Regulations Forbidding Export For Smelting Are Waived.

About 3,000 tons of silver-lead ore, which has been mined in the Mayo district of the Yukon, is to be sent to Selby, California, for smelting. An order of the governor-in-council has allowed this export, despite regulations of the department of the interior that such ore shall not be mined unless it can be refined in Canada. This exception has been made in view of the fact that there are at present no Canadian smelters who are prepared to accept the shipment for treatment.

Many mothers can testify to the virtue of Mother Graves' Worm Expeller, because they know from experience how useful it is.

It is contrary to the traditions of the British House of Commons for either cards or billiards to be played within its precincts. Members who require indoor recreations are expected to content themselves with chess or draughts.

When Baby Complains.

THERE ARE MANY WAYS a baby has of expressing any pain or irregularity or digression from its normal condition of health and happiness. A short sharp cry, a prolonged irritated cry. Restlessness, a constant turning of the head or of the whole body, fretful. In these and other ways a baby tells you there is something wrong. Most mothers know that a disordered stomach, or bowels that do not act naturally are the cause of most of baby's sufferings. A call for the doctor is the first thought, but in the event of any delay there should be ready at hand a safe remedy such as Fletcher's Castoria.

Castoria has been used for baby's ailments for over 30 years and has merited the good will of the family physician in a measure not equaled by any other baby's medicine because of its harmlessness and the good results achieved.

And remember this: Castoria is essentially a baby's remedy and not a cure-all for every member of the family. What might help you is too often dangerous when given to a babe.

Exact Copy of Wrapper.

Children Cry For

Fletcher's
CASTORIA

Let's Think It Over.

There is such a thing as saying too much on any subject, and the "grand-stand" talker sooner or later becomes a bore. The truth is always welcomed, and the truth reiterated and confirmed is more than welcome—it reaches your innermost soul.

Fletcher's Castoria is all its advertising has claimed for it: Scrutinized by the microscope of public opinion and used for over thirty years it stands without a peer in the hearts of thoughtful, cautious, discerning Mothers. And once used, mother love—there is no substitute for mother love—will scorn to try a "substitute" or a "just-as-good".

Masking under many names drugs that are injurious to the tender babe have found their way into some households, but the light of experience soon casts them out. Are they cast out before it is too late?

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

New Directors Appointed

Canadian Seed Growers Elect G. H. Clarke President.

George H. Clarke, seed commissioner of the federal department of agriculture, was elected president of the Canadian Seed Growers' Association at its annual meeting held in Ottawa. He succeeds Dr. James W. Robertson, who becomes honorary president. Among the directors are: George Dow, of Gilbert Plains, Man.; Dr. Seager Wheeler, of Rosthern, Sask.

When the first phonograph was demonstrated to the French Academy of Sciences the assembled scientists pronounced it nothing more than a feat of ventriloquism on the part of the operator.

Hair dye being at one time considered detrimental to long life, some of the insurance companies in Europe are said to have refused to insure persons who used it.

To Garner Crop

United States Army of Farm Hands Is Mobilizing.

An army of 100,000 farm hands now is mobilizing in the middle western grain belt to harvest the nation's crop of wheat and other grains. With prices rising, foreign competition throttled down by a high tariff barrier, wages near pre-war levels and crops forecast larger than last year, by the agricultural department, farmers of the United States count a good year in prospect.

If the whole of the watery vapor in the atmosphere were to fall at once in the form of rain it would not, according to experts, cover the entire surface of the earth to a depth of more than five inches.

A town cannot grow without business. By helping your local dealer you assist the community.

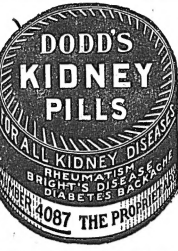

Japan Wants Oil
From Netherlands

Does Not Want to Accept Supply From U.S.

Negotiations have been opened up with the Netherlands Government by a new Japanese oil trust to obtain oil concessions in the Dutch East Indies. It is understood Japan desires to become independent of the United States in oil supply and is therefore trying to secure foreign concessions in addition to opening new fields in Japan and Japanese possessions.

At present, Japan is using twice as much oil as she is producing. The new Japanese oil trust will have a capitalization of \$16,000,000.

ECZEMA You are not a permanent when you get Dr. J.C. Chase's Ointment. It relieves at once and gradually breaks the skin. Sample box Dr. Chase's Ointment free if you send this paper and send 25c stamp for postage. See a box of all dealers or Edman, Bates & Co., Limited, Toronto.

Cuticura Soap shaves without mug.

Blind Men at Work

Report of St. Dunstan's Shows Soldiers and Sailors Busy.

Blind sailors and soldiers ready and willing to do their share in building the new world are to be kept busy. Sir Arthur Pearson states, in the sixth annual report of St. Dunstan's Hostel, that increasing schemes are in formation to create activities for blind sailors and soldiers. "We are still hard at it with the aftermath of the war," writes Sir Arthur. There are now 1,772 names on the books of St. Dunstan's, and more than 1,200 men are already at work.

Moose Visits Port Arthur.

A bull moose came into Port Arthur from the woods and near one of the main streets became entangled in a wire fence where, before being released after an hour's effort by police and others, he was an object of interest to many citizens. On getting free the animal scampered over the hills and disappeared.

No need to suffer with corns, or to run the risk of paring them. Remove them surely and painlessly with Holloway's Corn Remover.

New Winter Fair Building.

At a joint meeting of the Brandon winter fair board, the livestock breeders' association and the city council, plans were discussed for the proposed new Winter Fair Building, to take the place of the one destroyed by fire. The building will probably be of fire-proof construction and cost approximately \$125,000.

Moving Slowly.

Washington is moving for a repeal of the utterly illogical and irritating \$8 head tax on Canadians, native Canadians, who want to come over our border on business or pleasure. Some immigration laws get pretty close to the climax of legislative absurdity. Brooklyn Eagle.

Men fight with their fists, women with their tears.

Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills arouse these organs to activity they afford lasting relief for indigestion and overcome the many annoying symptoms.

Dr. Chase's Kidney-Liver Pills

World Happenings Briefly Told

A new wing to St. Joseph's Hospital, Sudbury, will be built, costing about \$4,000.

Colonel Robert 'Olds, European commissioner of the Red Cross, has announced his resignation.

At the age of 107, Henry Jones, Cumberland county's oldest citizen, and possibly the oldest Nova Scotian, died at Brookfield, N.S.

Donald Maclean, barrister, of Saskatoon, has been appointed a judge of the court of king's bench for Saskatchewan, it is officially announced.

The southward migration of the Menomitis to the United States will not take place until the fall, according to railway officials.

Fifteen job printers employed by the Herald Press, Montreal, went on strike when given work to do which came from a Toronto shop, where the men were on strike.

Mr. and Mrs. Frank Dill, who have "just stepped over" from Halifax, are the second pair of trans-Canada hikers to finish the Halifax to Vancouver journey on foot.

Two aerial police will be added to the Chicago force to regulate aerial traffic, assist in hunting bank and auto bandits, and patrol the lake front for persons and vessels in distress.

At a military track meet in San Francisco, twin brothers who look and run alike, so confused the judges that they gave them first and second place alternately in the six events they won.

Six firemen were killed and ten others injured when a fire truck crashed into the tender of the Barnegat Express at the Market Street crossing of the Central Railroad of New Jersey.

Enquiries have been referred to the Board of Trade by the department of marine at Victoria from J. M. Cairne, of Edmonton, who asks about facilities at Prince Rupert for the loading of deep sea steamers with lumber.

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given, the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are ward off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

England has reduced her war debt to Canada by one hundred million dollars during the last year.

O. McPherson, Furniture Dealer, Undertaker, 1111 Broadway, N. Y. C.

Minard's Liniment Co., Ltd., 1111 Broadway, N. Y. C.

Dear Sirs—Since the start of the baseball season we have been hindered with one muscle, sprained ankles, etc., but just as soon as we started using Minard's Liniment, our troubles ended. Every baseball player should keep a bottle of your liniment handy.

Yours truly,

W. E. McPHERSON,

Secretary American Athletic School, Baseball Team.

Health of Animals

Provincial Veterinarian Says Condition of Stock Improving.

Dr. M. P. McClellan, provincial veterinarian for Saskatchewan, states that one of the best ways of judging how cattle came through the winter is by observing the condition of animals at the spring sales. By this test, their condition is incomparably better than a year ago. At the present time the general health of animals was never better. "The steadily increasing demand," says Dr. McClellan, "for black fly and vaccine, which is handled by the livestock branch for the convenience of veterinarians and stockmen, amply testifies to the intelligent attitude adopted by the stockmen of the province toward preventive animal medicine."

Not For Him.

"Here, boy," said the man to the boy who was helping him drive a bunch of cattle, "hold this bull a minute, will you?"

"No," answered the boy, "I don't mind being a director in this company, but I'm durned if I want to be a stockholder."—Cartoons Magazine.

Clerk—Do you want a room for 50 or 75 cents?

Stranger—What's the difference between them?

Clerk—In the 75-cent rooms we put a rat-trap.

Nature has equipped a man for happiness, but he gets strenuous occasionally and slips a cog.

Ask for Minard's and take no other

THE MISERY OF BACKACHE

Removed by Lydia E. Pinkham's Vegetable Compound.

Meaford, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for backache, and I also had a female weakness. I felt dizzy and nervous, and was without energy. I had to force myself to do my work, and was always tired. Saw a Pinkham advertisement which induced me to take the Vegetable Compound, and my back gradually stopped aching and I felt lighter in spirit. I am recommending the Vegetable Compound with pleasure to all I meet who complain as I did."—MILDRED BRIDGES, Meaford, Ont.

Woman's Precious Gift.

The one which she should most zealously guard is her health, but she often neglects to do so in season until some ailment peculiar to her sex has fastened itself upon her. When so affected women may rely upon Lydia E. Pinkham's Vegetable Compound, a remedy that has been wonderfully successful in restoring health to suffering women. If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

He Changed the Place.

A Chicago banker was dictating a letter. "Tell Mr. Williams," he said, "that I will meet him in Schenectady." "How do you spell Schenectady?" asked the stenographer. "S-E, S-C-E-r-r-r-r— Oh, tell him I'll meet him in Albany."

A SPLENDID TONIC FOR WEAK PEOPLE

Dr. Williams' Pink Pills Act On the Blood and Nerves.

Food is as important to the sick person as medicine, most to be in many cases. A badly chosen diet may retard recovery. In health the natural appetite is the best guide to follow; in sickness the appetite is often feeble and depraved.

Proper food and a good tonic will keep most people in good health. Dr. Williams' Pink Pills are a fine tonic medicine, harmless and certain in their action, which is to build up the blood and restore vitality to the run-down system. For growing girls who are thin and pale, for tired women, and for old people who are in strength, Dr. Williams' Pink Pills are an ideal tonic. Thousands have testified to the benefit derived from the use of this medicine, and then there is Mrs. William Gallie, Hantsport, N.S., who says: "Before I began the use of Dr. Williams' Pink Pills I was weak and run down that I could hardly do my own work. I often suffered from headaches and was very nervous. I then began the use of Dr. Williams' Pink Pills and I can truthfully say I have found them the best medicine I have ever taken. You may depend upon it I will advise other sufferers to take these pills."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Admiral Sims Has British Sympathy

London Post Says He Spoke The Exact Truth.

The Yorkshire Post, commenting on the Sims incident says: "There will be general sympathy in this country for Admiral Sims, that breezy sailor and inveterate friend of Great Britain, who once more has got into hot water in the United States for his plain speaking about Anglo-American relations. It would be unfortunate if the action taken regarding Admiral Sims were construed into evidence of a definite attitude on the part of the United States Government towards the British question."

Commenting on the case, the London Morning Post says:

"Everybody in the United States and everybody in this country knows that Admiral Sims spoke the exact truth."

Michigan now ranks fourth among the States in the production of paper. More than \$150,000,000 is invested in the industry in that State and the paper mills employ more than 11,000 men and women whose wages total in excess of \$18,000,000 a year.

An Oil that is Famous—Though Canada's Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. It is far field enough to attest its excellence for in all these countries it is on sale and in demand.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

Ukrainians Learn Poultry Business

Successful Work Done by Dominion Poultry Branch.

Teaching ten thousand Ukrainian farmers the "why and how" of the poultry industry, improving the conditions in the poultry industry generally, increasing the size of the flocks, replacing scrub stock with better bred stock, and lastly, but not least, organizing some system of co-operative marketing of the eggs after they have been produced. This is the work that was started last March by the Alberta representatives of the poultry division of the Dominion livestock branch in the Ukrainian settlements of Alberta, and judging from the results that have been obtained already, the ten thousand farmers, situated in the poorest and roughest sections of Alberta, will eventually be the heaviest egg producing section of the west.

A Byway Parable.

A small boy was laboriously pushing a heavy hand-cart up a steep hill, and stopping every few minutes to wipe the perspiration from his face. A clergyman who was watching the boy, thinking to help him, called out: "Push it up zig-zag, my lad, and you will find it much easier." "Not so much of 'yer blomin' advice," retorted the boy. "Come and give me a shove."—Tatler (London).

Corns, Warts, Bunions

Painlessly Removed.

Don't limp any longer, don't suffer another hour from corns. The oldest remedy and the best, the one that for fifty years has proved a true success, will lift out your corns in a hurry. Putnam's Painless Corn and Wart Extractor is the one remedy to use. Refuse a substitute, 25c every-where.

Italian Cab Driver Scored

Gets Better of Boasting Contest With Yankee Visitor.

They are telling a story in the Roman camps of how an American visitor to Rome came off second best in a boasting contest with a Roman cab driver.

The American undertook to see Rome in a day and used the cab driver as a guide. The American was driven to all the great Roman monuments and took great interest in the buildings, always asking how long each took to build.

At St. Peter's the cab driver confessed that it took 50 years to complete that structure. The American did not think that that was such a great feat, for he was certain that such a building could be built in America in two years. Other large churches, like St. John Lateran, the visitor said, could be built in a year or even six months.

Finally, they were passing the new massive buildings occupying several city blocks containing the Italian law courts.

"What's that?" inquired the American.

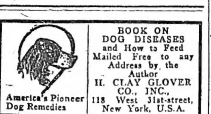

"I don't know," retorted the driver. "It wasn't there last night."

A Celestial Racer.

The fastest star travels through space at a speed of about three hundred miles per second. This celestial racer is invisible to the naked eye, but has a number of other means of identification for the convenience of astronomers.

MONEY ORDERS

It is always safe to send a Dominion Express Money Order. Five dollars costs three cents.

Fringe Invades The Realm Of Pyjamas

By Marie Bélmont.

Fringe is in high favor at the present time for adorning the varied garb of lovely woman. These pyjamas inspired by the cowboy's picturesque attire, show how effective fringe really is. They are made of pale blue crepe de chine and the fringe is of blue and pink silk. The shirt is cut generously long, so that it may be bunched about the figure. A soft fold of the crepe de chine is draped around the waist-line and knotted at the side. The collar duplicates the gay handkerchief of the cowboy, and is cut from blue crepe de chine. The turnback cuffs are also made of blue crepe de chine.

Minard's Liniment used by Physicians

Canada's Exports To Germany

Great Increase In 1920 Over Pre-War Years.

That France is Canada's chief customer among European continental nations at present, and that Canada's exports to Germany during the past fiscal year exceeded those of the pre-war year, 1913-1914, are two points brought out in the bulletin of the Department of Trade and Commerce. Exports last year showed an increase also to Sweden, Norway, Turkey, Spain and Portugal. Exports to Italy, mostly wheat, rose to \$7,750,000, from \$17,000,000 in the previous year.

Minard's Liniment Lumberman's Friend.

Aconite and camphor are the principal chemicals used in the manufacture of joss sticks. The aconite serves to prevent ravages by rats and mice, and the camphor ensures a steady fire when the sticks are burned. The aroma is supplied by many odoriferous drugs in the manufacture.

FRED ROBERTS, of Vancouver, B.C., says he knows what it is to enjoy good health for the first time in six years—Rheumatism is relieved and has gained ten pounds.

"For the first time in six years I know what it is to enjoy good health, and since it was Tanlac that got rid of my troubles and put me into fine shape, I think it is up to me to state the facts for the benefit of others," said Fred Roberts, 1624 Georgia St., East, Vancouver, B.C.

"I suffered for years from biliousness and my appetite varied a lot. Sometimes I would hardly touch a bite and other times I would eat a hearty meal, but, as sure as fate, if I did eat anything, I had to suffer for it afterwards. I would get nauseated and bloat up with gas so bad I'd have palpitation of the heart and almost choke for breath. I had violent headaches that left me weak and lifeless and suffered with such awful pains in the back that it was agony to stoop over. I also had rheumatism in my right leg which gave me a lot of trouble and which kept me awake so much at night that I was tired most of the time."

"I've only taken four bottles of Tanlac so far, but already I have gotten wonderful results from it. I have a good appetite, can eat anything I fancy and never have a sign of biliousness or gas or pain afterwards. My fondness seems to do me good too, for I feel much stronger and have gained ten pounds in weight. I'm not bothered with pains in the back any more and the rheumatism has entirely disappeared. I now sleep well at night and get up feeling fine. My wife also has been taking Tanlac with wonderful results and she joins me in expressing our thanks for the great good we have gotten from it. Tanlac is sold by leading druggists everywhere."

Saskatoon Public Utilities Profit. Saskatoon public utilities show a net profit of 31,146 since the first of the year.

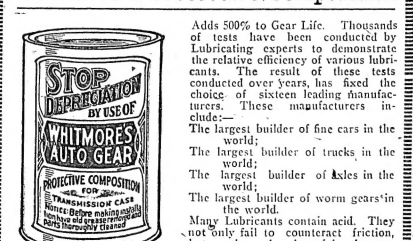

Cook's Cotton Root Compound
This is the best medicine for all kinds of ailments. Sold in three sizes: 25c, 50c, and \$1.00 per bottle. Sold by all druggists. Price of bottle of 25c. Free pamphlet. THE COOK MEDICINE CO., TORONTO, Ont. (Solely Wholesale)

The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of Lubrication, but the kind of Lubrication

Whitmore's Protective Composition

Adds 500% to Gear Life. Thousands of tests have been conducted by Lubricating experts to demonstrate the relative efficiency of various lubricants. The result of these tests conducted over years, has fixed the choice of sixteen leading manufacturers. These manufacturers include: The largest builder of fine cars in the world; The largest builder of trucks in the world; The largest builder of buses in the world; The largest builder of farm gears in the world. Many Lubricants contain acid. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Compositions Contain No Acids

They are proof against heat and cannot break down or squeeze out. In the Panama Canal Emergency Dams, six million pounds rest on an unbroken film of WHITMORE'S. After an exhaustive test the U.S. Army contracted for its exclusive use.

Manufactured by—
THE WHITMORE MANUFACTURING CO., Lubricating Engineers, Cleveland, Ohio.
CANADIAN AUTOMOTIVE SALES COMPANY, Toronto, Montreal, Winnipeg, Regina, Canadian Selling Agents.

Farmers Have Confer- ence with Education Department

Important Discussion on
Educational Affairs—

Resolutions of Approval
Are Passed

The joint educational commit-
tee of the U.F.A. and the U.F.A.
W.A. held its first official confer-
ence with the Minister of Educa-
tion yesterday. A very full and
satisfactory discussion took place
regarding all phases of rural
school problems. The efforts of
the Department to provide High
School opportunity for rural
children were strongly approved
as was also the general attitude
of the Department in defending
the autonomous rights of school
boards. The members of the
Committee made many helpful
suggestions and declared their
support of any plan that would
equalize the educational burden
throughout the Province.

After the Conference the mem-
bers of the joint committee met
in the Corona hotel and passed
the following resolutions which
were forwarded to the Minister
of Education.

That we are in favor of the
authorised form of teachers' con-
tract with an amendment to

clause 5 regarding termination
of agreement, making this clause
reciprocal and providing, in the
event of either party breaking
the contract a minimum penalty
equal to one month's salary.

That we favor the principal of
the conciliation board.

That we express our approval
of the increase in the number of
examination centres.

That we are in favor of plan of
procedure now followed in form-
ing consolidated schools as out-
lined to us by the Minister of
Education.

That we are glad to note that
the number of official trustees
has been materially reduced.

That we are in favor of a sys-
tem of Provincial taxation for
educational purposes

The report was signed by P.
Baker, Ponoka, Chairman Mrs. S.
S. Cunn, Paradise Valley, Secre-
tary Stephen Lunn, Pincher
Creek, Henry E. Spencer, Edger-
ton.

CUT THIS OUT FOR READY REFERENCE

Here are the dates of the fairs
to be held in this vicinity:

Sibbald, August 1.
Richdale, August 2.
Oyen, August 2 and 3.
Chinook, August 4 and 5.
Youngstown, August 8 and 9.
Big Valley, August 12 and 13.
Munson, August 15.
Highland (Delia) August 11.
Hanna, August 9 and 10.

SELL TO PUBLIC

A new regulation recently put
in force by the Federal Depart-
ment of Mines provides that in
future lapsed oil claims shall not
be available for releasing on ap-
plication, but shall be offered for
sale by public tender.

ANOTHER 14-POINTER

A Chinook lad entering the
packet of gopher tails in the mun-
icipality competition, wrote:
"Here's the tails; Send the mon-
ey. Hurry up!"

President Wilson's brevity of
speech never had anything on this
Chinook youngster.

IMPROVED SEED

The Dominion Department of
Agriculture, through the Seed
Branch, works in active co-opera-
tion with the provinces in the
matter of improving grain and
field seeds. Money is provided to
pay prizes in standing field crop
competitions, at seed fairs and
provincial seed exhibitions, and
in combined seed crop and clean-
ed seed competitions. The last
named is a recent production.
It has two distinct phases, the
first consisting of a standing field
crop competition and the second
of threshed and cleaned seed in
which the seed produced from the
fields of the first phase is judged
in the granary of the competitor.
The competitions must have at
least fifteen entries in each, and
the foundation seed must be of
approved origin. The minimum
quantities of cleaned seed that
competitors must be prepared to
submit to qualify for awards are:
Wheat, barley, peas, buckwheat,
and corn, each 100 bushels; oats,
200 bushels; field beans, 25 bush-
els, clovers and timothy 15 bush-
els, and potatoes 150 bushels. The
awards, except in the case of po-
tatoes, are made on a basis of 65
per cent. on the bin score and 35
per cent. on the field score. In
the case of potatoes the method
is reversed, award being based
on 35 per cent. on the bin score
and 65 per cent. on the field score.
All agricultural associations are
eligible to conduct these competi-
tions, provided the association
entering does not conduct a field
crop competition in the same sea-
son with the same kind of crop.
To the prize money under sub-
vention agreement the Dominion
subsidizes \$200 in each instance
and the province \$100.

Last Sunday was U.F.A. Sunday,
and Mr. Robt. Smith, of the Ad-
vance, occupied the pulpit of the
Chinook Church delivering a
forceful address. He said in
part—"This is a day of organiza-
tion. Any organization, in order
to function for the uplift of human
society, must ally itself with
Christianity. The U.F.A. as an
organization must consider itself
but as one member in society and
seek to co-operate with all other
members. We must always have
regard for the other fellow."
—Contributed.

Ratepayers' Meeting

A meeting of the ratepayers of
Chinook was held in the town
offices last Monday evening to
discuss some better system of fire
protection. A committee con-
sisting of Messrs. Deman, Dunn
and Woodruff was appointed to
enquire into the costs and the
efficiency of different systems,
and report to the Council and at
a later meeting of citizens.

The following resolution has
been forwarded to the Superin-
tendent of the C.N.R., Calgary.
The Citizens of Chinook, here-
by express their appreciation of
the effective assistance given
them by the train crew and pas-
sengers of the C.N.R. passenger
train No. 10, under the leader-
ship of Conductor Jones, in fight-
ing fire on the night of June 15
last. They made it possible to
confine the fire to a small area
and save the town.

Catholic Ladies Auxiliary

A meeting of the Catholic
ladies of the town and country
met at the home of Mrs. I. W.
Deman on Wednesday, June 15.
A society was formed and ar-
rangements made to hold a tea
the latter part of July. The
Society was given the name of
the "Catholic Ladies Auxiliary".
The money raised by the auxil-
iary goes toward swelling the
Church fund. The Auxiliary
meets the second Wednesday of
every month at 3 p.m. On July
13 the ladies meet at the home of
Mrs. Hinds. Ladies that were
not at the meeting to join the
Society are cordially invited to
do so at the next meeting.

The following nine ladies have
joined and the officers are: Mrs.
Deman, President; Mrs. F. Mar-
ris, Vice Pres.; Mrs. O. Hinds,
Sec. Treas. Mesdames Riel, Ray,
Somers, Massey, Forest and Tag-
gart.

A most enjoyable afternoon
was spent at the home of Mrs. A.
Nicholson on Saturday, June 11,
when a number of her Laughlin
friends planned a surprise party,
the occasion being Mrs. Nichol-
son's birthday. After serving
faintly refreshments, the ladies
presented Mrs. Nicholson with a
hand painted china celery dish
and some pyrex ware, as a slight
token of their esteem.

The Agricultural Society is de-
sirous of making their fair this
year a great success. A com-
mittee has been appointed to
wait upon all residents of the ter-
ritory tributary to Chinook to
seek their co operation.
